Saddam is gone, Arafat is dead, and a new Iraq is rising. But when a suicide bomber strikes Washington and assassinations unfold from London to Los Angeles, Jon Bennett and Erin McCoy are drawn back into a world of terror they thought was over. At the heart of the mystery lies a 2,000-year-old scroll describing unimaginable treasures that could lead to the Third Jewish Temple. Some call it history's greatest treasure map. Others call it a road map to Armageddon. But the time to find the truth is running out fast.

Reviews of the **The Copper Scroll (The Last Jihad)** by Jeff Woodman, Joel C. Rosenberg

## 1. Eta

I must admit I passed on this series for years. I hadn't heard about this series until long after Saddam Hussein was dead and I figured what was the point. Still and all I had enjoyed other Joel Rosenberg books so I gave it a try. It was dated but still a good read and the Ezekiel Option sounded fresh so why not. Wow it was great, thinking the theology was a bit off (I fall into a more Islamic Antichrist camp), but then not so far as I had thought. But with the end game in the Ezekiel Option and then the Copper Scroll and we are back to a ripped from tomorrow's headlines. Already downloaded the next book, got to wait until tomorrow well today because I stayed up half the night, I just couldn't put it down.

One closing comment not last because it's not important but last because it should be remembered. The Last Jihad series does not back away from scripture, in fact I had to reread some that is used, it is in context and powerful. Most importantly it does not back away from the gospel. If you are a Christian you will enjoy it. If you are buying it for an unbelieving friend, great choice. If you are an unbeliever take a chance you just might change your life...forever.

## 2. Opithris

I stumbled across Joel Rosenberg from watching some commentary about a recently discovered Psalms book found in the middle east. That was 2 months ago and 3 books later; starting with "The Ezekiel Option" to "Copper Scroll", then finishing up with Dead Heat (the last of his series). I have never been a reader, nor did I read or remember any mandatory reading in high school and how I managed passing college courses without truly reading the text amazes me. Over my life, I've yet to find an author that I could actually plow through the first chapter and really want to keep reading.

Now, I am enthralled with Joel R. My only disappointment is I didn't discover his writings till now. I started at "The Ezekiel Option" and moved forward through "The Copper Scroll" which taught me quite a bit about archeological discoveries that I didn't know about. Of course I don't know about all discoveries but those of relevance (regarding my faith) I would have hoped I was more informed either through my own initiative or through the media or history channel, etc (haha). I knew about the "Dead Sea Scroll" and some of the information surrounding those. This book

however, revealed to me much more and since his books are fiction, it was important to me to find out what is fiction and what is non fiction; so while I read the book, I often was searching the internet for substantiating data. This helped me to better understand his references, the history, the ideas, the "folklore", and geographical and archeological endeavors of researchers today and in the recent past. One does not need to do all this to enjoy this book because if you take it for what it is "fiction", than you don't have to concern yourself with more than it being a suspenseful, thriller of political and religious conflicts. However, since I am a Christian and want truth; I was inspired to research and become knowledgeable in matters I was not, prior to this book.

All his books are amazing, all worth sleepless nights, purposely taking my time at coffee shops and anywhere else for that matter to get through them. They are so creatively written using real life, current and probable world political situations to create the "end times" theories into fruition. I believe in the bible and all its written scripts from beginning to end and have in the last year become more fascinated with the many biblical prophecies, which include the return of Jesus, coming for his followers. His studious approach to his Jewish heritage and Christian faith, along with his professional experience in government affairs has afforded him an abounding ability to bring scripture to life in our current generation. If you're at all interested in a great political thriller; this will fulfill your desires. If you're interested in biblical prophesy, his writings will join the religion and politics together gracefully, and if you're interested in being entertained regardless; his books will do it. I am a simple person and his perspective has opened my eyes beyond any measure I could imagine and raised the bar of understanding our current political climate.

### 3. Walianirv

Rosenberg is a good artist of words. Painting a picture with words for imagination to construct and invest emotion. While initially using real archeological and Biblical clues and information he quickly moves to possibly personal held thoughts and beliefs to draw the reader deeper into the frame of the picture he has painted. This is a the fourth book in a series of five so the ending leaves you wanting closure- but that comes only when you read the next book. Oldest skill in sales, leaving them hanging until next; week, month, year, season, book..... But it still is a well researched and enjoyable read.

#### 4. Ceck

suspense, the reality, the love, the danger, the marvel of discovery was so intense. I must read it again soon and absorb it even further. I admire the works of Mr. Rosenberg already and have been a huge fan, but this threw me in a whole new level. Thanks.

#### 5. Galanjov

This book pulls you in and leaves you wanting more! The Last Jihad series is very well written and really keeps you glued to your book. I am so impressed by the quality of writing and am equally drawn in by the subject matter. You will not be disappointed!

#### 6. Vutaur

This book is the fourth of five in the series. I am currently reading the fifth. The novel is based on the copper scroll that was found in the Dead Sea caves. From the introduction to the novel, I was thoroughly entertained with the fictional story as well as learn about this important piece of history. The story is purely fiction but reads as though it might be happening today.

For those interested in faith issues, this story lays out the Gospel message with clarity. Not abstinence, it is presented with a gentleness that is appreciated, yet revered.

The book continues the story of Joe and Erin Bennett as their relationship builds from employer/employee relationship to colleagues to marriage. The books offer a little of everything for the reader. All five books are

page turners.

#### 7. Friert

This imaginary story about biblical studies is also a complicated espionage story. It is also quite unbelievable. It does make interesting reading however.

8. Rosenberg has done a great job with Book 3 of his series. His research has been included in terms which have kept the story feeling real. His use of religion, prayer and miracles has been believable without being too preachy. I have enjoyed every minute of it. My only complaint has been with the narrator, who has shown a lack of experience with activities in the book and with correct pronunciation of foreign names. I highly recommend this series and this book to the readers of thrillers.
